Das Nachhaltigkeitszertifikat der OvGU

What does our lunch have to do with intergenerational justice?

Is electromobility the best solution?

How can education be used as a resource?

Find out! Study NAO!

What and for whom is the NAO?

The OvGU Sustainability Certificate - NAO - is a cross-curricular study programme. It can be obtained by attending several courses in different module areas and is issued separately from the degree certificate.

It can serve as a profile in the degree programme as well as a professional qualification and aims to develop skills in the sense of education for sustainable development, which should enable students to make sustainable decisions and to recognise and react to problems of (non-)sustainable development.

Further information, the event catalogue and contact persons can be found on the website: www.nao.ovgu.de/eng/

Module areas

Fundamentals of sustainability

Economy and technology

Politics & Society

At least 20 Credit Points = Sustainability certificate
